COMPLAINT:

COMBINE PERFORMAX INSPECTION ON FARM (plus parts)

CAUSE:

CORRECTION:

ON FARM INSPECTION

- Inspect engine oil & filter (filter extra)
- Inspect fuel filters (filters extra)
- Inspect engine air filters (filters extra)
- Inspect cab air filters (filters extra)
- Grease all fittings

1. FEEDER HOUSE SECTION:

- Inspect feeder house frame, shields, contour master cylinder, frame, pivots, pins, supports pivot & floor sheets for cracks or wear
- Inspect all hydraulic hoses, fittings, couplers, lines & cylinders for leaks
- Inspect drum wear ring/bearings/supports/stops & pins
- Inspect feed plate, top door seal & mounting plate seals
- Inspect wiring, speed and position sensors
- Inspect feeder house reverse gearcase, cable, linkage & oil cooler
- Inspect conveyor chain, plastic chain guides and eyebolts & drive chain
- Inspect shafts/bearings/sprockets, stripper plates, slip clutch & air flow dust fans
- Inspect feeder house belts, variable drive sheaves, bearings & idler

2. TRANSMISSION/AXLE/FINAL DRIVES:

- Inspect brakes, wheels, tires, transmission drive shaft, final drives, seals & axle couplers
- Inspect hydro motor, PRWA motors, cable, fittings, lines, hoses, seals, transmission & final drive oil levels
- Inspect steering cylinder, hoses, tie rods, lug nut torque, toe-in, rear axle spindles, bearings & seals
- Inspect sensors, solenoids & wiring

3. FRONT

- Inspect stone trap, shoe augers, bearings, bevel gears & drive shaft
- Inspect feed accelerator wings, flights, shaft, bearings & tri-flow feed ramp
- Inspect speed sensors, wiring, & lights
- Inspect rotor, seperator tines, shaft, bearings, concaves, & concave inserts
- Inspect steering motor, valves, hydraulic lines, hoses & fittings
- Inspect ladder, latch, fire extinguisher, & safety shields

4. LEFT HAND SIDE:

- Inspect gull wings, door cylinders, safety shields and guards
- Inspect electric clutch, brush module, speed sensors, wiring, adjuster motors, lights and Greenstar monitor sensors and wiring
- Inspect primary countershaft 90° gear case, driveshaft, u-joints and bearings
- Inspect hydraulic vavle stack, accumulator, reel pump, lines, filter and hoses
- Inspect belts, sheaves, idlers, tension adjustments, variable sheaves and adjuster linkages
- Inspect discharge beater, spreader, chopper, cleaning fan and unloading auger shafts, bearings and housings

Make/Model:	Meter	Serial Number:	EQ Id:	Fleet No:
JOHN DEERE 9500	4447	H09500X673296	673296MT	

Inspect drive chains, sprockets, and idlers
Inspect frame, sheets, cleaning fan fins and shields for cracks or wear
Inspect cleaning shoe arms, bushings, hangers, bolts, bearings and seals
Inspect separator frame, threshing covers, shaker pan, bearings, chaffer, sieves, seals and adjusters

5. RIGHT HAND SIDE

Inspect gull wings, door cylinders, safety shields, threshing covers, fan duct and guards
Inspect cab wall electrical harness, speed & position sensors, wiring, adjuster motors and lights
Inspect belts, pulleys, idlers, slip clutches and tension adjustments
Inspect loading auger gearcase, chains, sprockets and idlers
Inspect primary and secondary shaft bearings, seals and bushings
Inspect variable sheaves, shafts, cam, springs and alignment
Inspect shafts, bearings, bushings, seals and arms
Inspect clean grain elevator and tailings elevator chains, sprockets, housings, boots and augers
Inspect Greenstar monitor sensors and wiring
Inspect fuel tank, water separator, fire extinguisher and ladder

6. REAR

Inspect spreader disks, rubber flaps, frame, motors, hoses and bearings
Inspect chopper tail board, vanes, rotor, blades, housing, knife bank, cob deflector, bearings and raise/lower cylinder
Inspect rear panel, lights, sensors, safety shields and smv sign
Inspect discharge beater wings, wear strips, grate, shaft and bearings

7. GRAIN TANK

Inspect unloading auger cylinder, hoses, fittings, gearcases, bevel gears, sump & boot
Inspect unloading augers, driver, housing, bearings, shafts, trough & extensions
Inspect sensor, wiring, mass flow sensor, & lights

8. ENGINE COMPARTMENT

Inspect all engine, primary gearcase, hydrostatic & related systems

9. CAB SECTION:

Inspect all controls, displays, switches, mirrors and Climatrak functions
Inspect windows & wiper blade

Serial number H09500X673296

4447 engine hours 2840 separator hours

I inspected the combine and I found a few things that needed to be replaced.

The transition door at the back of the feeder house was worn, feeder house drive chain was stretched, outside right walker block bearing was loose, negative battery cable clamp was cracked. The customer wanted the outer engine air filter, cab air filters and hydraulic oil filters changed. I tightened up the elevator chains and the feeder house conveyor chain. I tested everything out on the combine and it all worked like it was supposed to. I greased the combine up and checked all of the gear box oil levels.

REPAIRS FROM INSPECTION
FAN SPEED MOTOR ONLY TURNS ONE WAY

CAUSE:

CORRECTION:

The customer stated that the cleaning fan wouldn't adjust. I turned the screw by hand and it turned freely. I tested the power circuit at the plug and found that I had power both directions. I noticed that the terminals were pinched so I spread them out and plugged the motor in and it worked in both directions. I put the motor on the combine and it moved the cleaned fan sheave up and down.

The customer had a walker bearing block on hand so I installed it on the right outside one that was loose. I came back to the shop and got all of the parts that I needed and when it worked for the customer I went back out. I assembled the transition door at the shop before I left. I changed the hydraulic filters and topped off the oil levels. I pulled the engine air filter out of the box and found that it was damaged inside the box so I couldn't install it. The customer said that they would come and get a new one and that I didn't need to come back for that. The customer also said that they would change the cab filters out. I changed the negative battery cable and the feeder house drive chain. I also changed out the transition door at the rear of the feeder house. I test ran the combine when I was done and it sounded good.
